

This is the 1st page of the app. It shows the transaction of the employees and on what they have spent on. Which type of payment was made ,date ,category and also notes can be taken.

The screenshot shows the 'Transactions' app interface. At the top, there's a header with the title 'Transactions', a search icon, and a star icon. Below the header, there's a date selector showing 'January, 2024'. Underneath, there are tabs for 'Monthly', 'Calendar', 'overall summary', and 'text'. A summary table is displayed with columns 'Income', 'Expense', and 'Total', showing values '55.0', '0.0', and '55.0' respectively. Below the table are two buttons: 'Income' and 'Expense'. Further down are six input fields labeled 'Select Date', 'Amount', 'Category', 'Account', and 'Note'. At the bottom, there is a 'Save Transaction' button and a navigation bar with three icons.

The screen is of stats which shows that on which the most has been spent.

The income and expense both can be categorised as yearly,monthly and daily and the app also shows total.

In the account section the accounts are kept and you can add the transaction via the plus button.

The output is shown on my phone which is connected via wireless debugging in android studio.

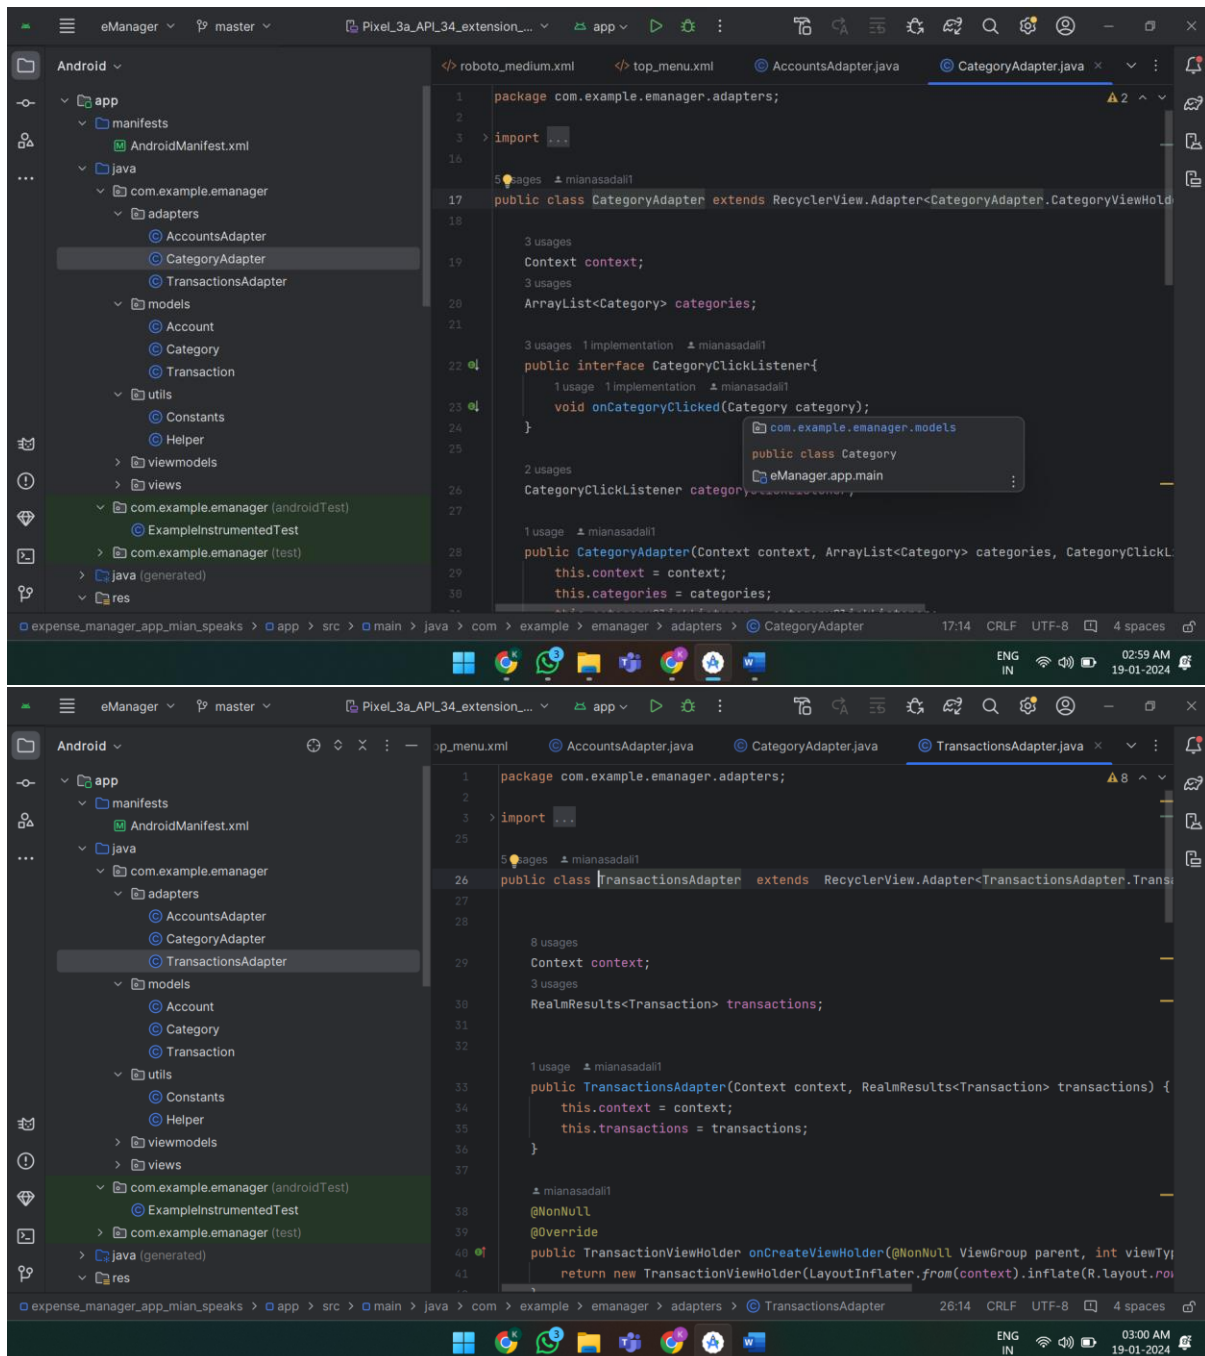

The app name is kahaan e manager.

The code images

```
11 import com.example.emanager.R;
